

## Tba network meets for its Annual General Meeting

29 March 2019

The Annual General Meeting of tba network took place on 29 March 2019 in the new headquarters of Durst Phototechnik AG in Brixen. The Business Angels got an exclusive glimpse behind the façade of this new iconic building prior to its official opening.

As part of the meeting, two founders had the opportunity to present their business ideas in front of 17 Business Angels. The investors showed great interest in learning about the products, the business models and the entrepreneurs themselves. In fact, they used the subsequent business lunch to mingle with the founders and interview them further.

Klaus Plieger from Lajen (South Tyrol) introduced PENAROSA to the audience. This customizable ladies' watch is built from four modules that are flexibly interchangeable. He impressed the audience not only with his age (22!), but also with his ambition and commitment to create a watch specifically for women, giving them countless options to personalize their accessory.

As a solo-entrepreneur, he has already set up a production line, logistics and a web shop with several external partners and will be ready to sell his first batch later this April.

Dieter Duftner from Innsbruck (Tirol) presented his Institute of Microtraining, a "mobile learning" application, specifically designed to make employee trainings simpler and more sustainable (for example, trainings for Compliance, Job Safety Regulations, etc.). Many of the investors of tba network saw potential for the app to be introduced in their own companies and engaged in fruitful discussions with the founder.
